

User Robert adds FAA medical information:

Robert clicks on Sign In link and is directed to sign in page.

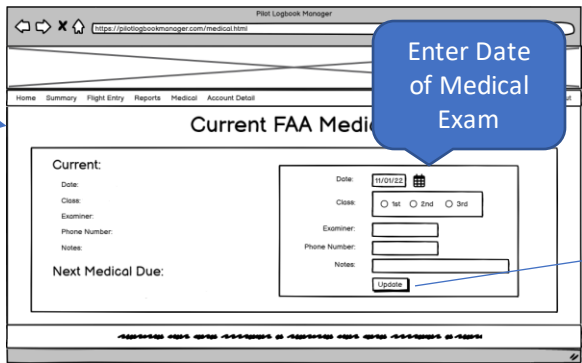

Robert enters his email and password and clicks submit. He is directed to user home page.

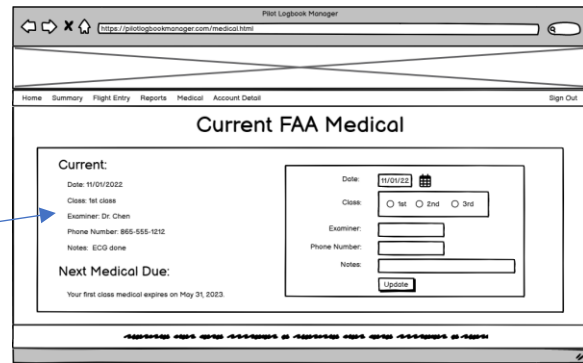

Robert sees information letting him know that app can track when his next medical exam is due.

Robert clicks on the image link for Medical and is directed to the FAA Medical page. He does not have any information entered currently, so he fills out form.

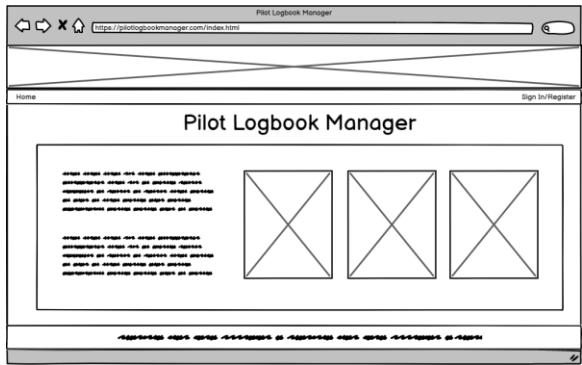

Robert sees tips to help him know what data to enter.

Robert clicks submit and sees his data on the screen as well as a message letting him know when his next medical is due.

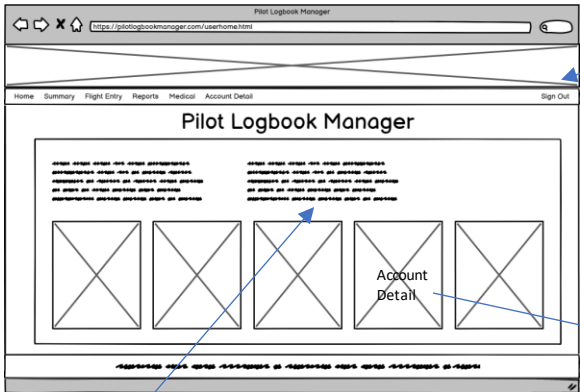

User Benjamin adds Account Detail information:

Benjamin clicks on Sign In link and is directed to sign in page.

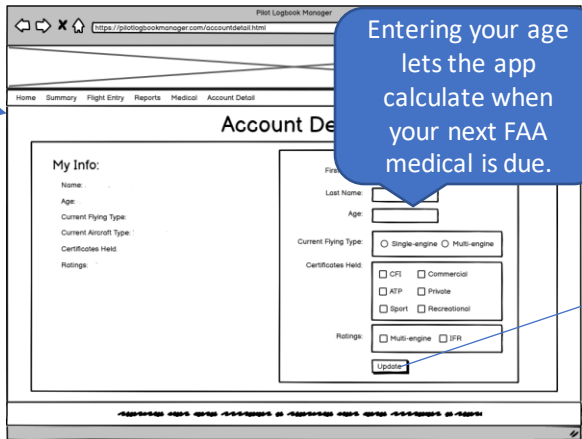

Benjamin enters his email and password and clicks submit. He is directed to user home page.

Benjamin sees information letting him know that flight entry is quicker if he sets up his account details first.

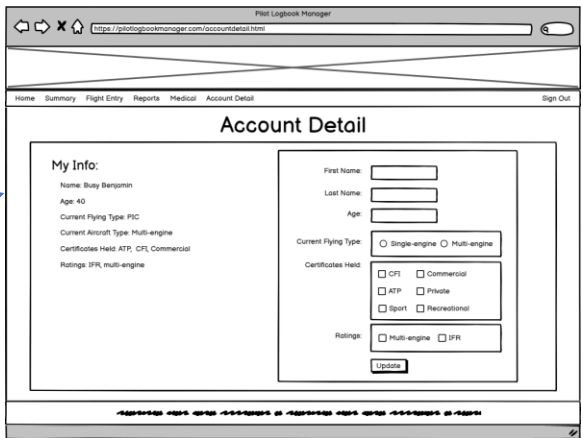

Benjamin clicks on the image link for Account Detail and is directed to the Account Detail page. He does not have any information entered currently, so he fills out form.

Benjamin sees tips to help him know what data to enter.

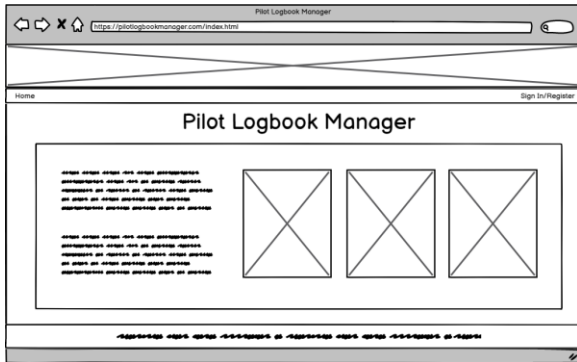

Entering your age lets the app calculate when your next FAA medical is due.

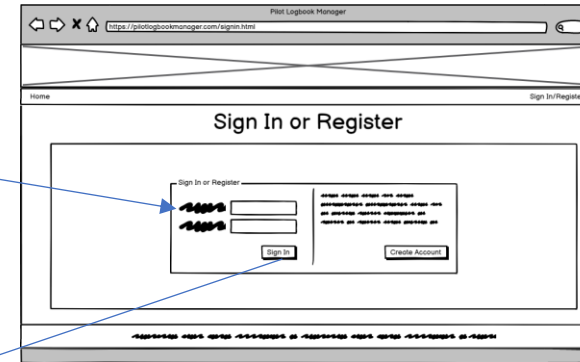

Benjamin clicks update and sees his data on the screen.

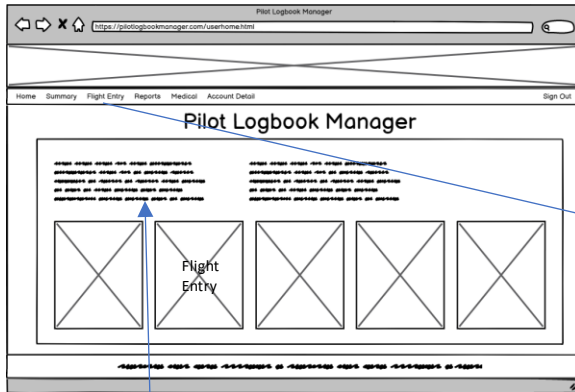

User Noel adds first flight to logbook:

Noel clicks on Sign In link and is directed to sign in page.

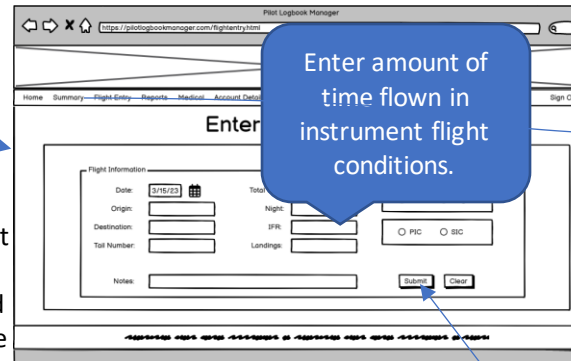

Noel enters her email and password and clicks submit. She is directed to user home page.

Noel sees information letting her know that she can enter her account details first for easier flight entry, or can go ahead and enter her first flight.

Noel clicks on the flight entry link in the navbar. She is directed to the flight entry page where she can enter her flight details. She can see tips if she has a question about what information to enter.

Noel clicks submit. She will get an error message if she missed any information, or confirmation if flight was successfully added.

Noel clicks on summary to see her added flights.
